Difficulty in opening or closing Y N Difficulty in chewing Y N

Have you ever had any prolonged bleeding following extractions? Y N

***If you could change anything about your smile, what would you change?***

### **AUTHORIZATION & RELEASE FOR GENERAL RISKS ASSOCIATED WITH DENTAL TREATMENT:**

I certify that I have read and understand the above information to the best of my knowledge. The above questions have been accurately answered. I understand that providing incorrect information can be dangerous to my health. Thank you for choosing Jennifer A. Neise, DDS, PC for your dental care. We hope to work with you to help you achieve excellent oral health. While recognizing the benefits of a pleasing smile and teeth that function well, you should be aware that dental treatment, like treatment of any other part of me body, has inherent risks. These are seldom great enough to offset the benefits of treatment but should still be considered when making treatment decisions. Benefits of dental treatment include: relief of pain, the ability to chew properly and enjoy eating, and the confidence and social interaction that a pleasing smile can bring. Common risks associated with virtually any dental procedure include:

- **Allergic reaction.** Dental materials and medications may trigger allergic or sensitivity reactions.
- **Long-term numbness** (paresthesia). Local anesthesia, or its administration, while almost always adequate to permit comfortable care, can result in temporary or, in rare instances, permanent numbness.
- **Muscle or joint tenderness:** Holding one's mouth open for prolonged periods of time, such as during dental treatment, can result in muscle or jaw joint tenderness. In a predisposed patient, it can precipitate a *TMJ* disorder.
- **Sensitivity in teeth or gums, infection, or bleeding.**
- **Swallowing or inhaling small objects.**

We follow procedural guidelines that most often lead to clinical success but, as in any other pursuit in health care, not everything always turns out the way it is planned. We will do our best to ensure that it does. Please feel free to ask questions in regards to any and all dental procedures that are recommended to you for yourself or for your dependent(s).

My signature below indicates that I have read and understand the general risks associated with dental treatment.
